

The 72nd RILEMWEEK 2018
The 4th Inter. Con. on Service Life Design for Infrastructures (SLD4)
Inter. Symp. on Concrete Modelling (ConMod2018)

@TU Delft, the Netherlands, 26-29 August 2018

DEADLINE
Paper submission
March 1

Issue Two, 14 Feb 2018

Organized by

Delft is a city that is full of culture, traditions and a network of fantastic canals. Located in the South Holland province, Delft is directly in-between The Hague and Rotterdam. With origins in the 11th century, delft has always had an association with canals and it was developed into a city around the 13th century.

The renowned Dutch leader William of Orange had a residence in Delft and during the 1500's it was one of the prominent cities in the Netherlands for many years. In modern times, Delft has become well known for its ceramic pottery industry and also has a plethora of historical monuments and stunning architecture such as the city hall and Oostpoort.

The notification of the acceptance of the paper is 15 April. If you need an invitation letter earlier in order to arrange your visa, please contact us by sending an email.

Main topics

- Asset Management
- Service Life Design
- Service Life Modelling
- Infrastructure design
- Materials behaviour and optimisation
- Repair and Maintenance
- cement hydration
- microstructure formation
- mechanical properties
- transport properties
- degradation mechanisms
- durability
- More...

Conference Sponsors

The International Union of Laboratories and Experts in Construction Materials, Systems and Structures

American Concrete Institute
Advancing concrete knowledge
