

AWARDING THE ROBERT L'HERMITE MEDAL

It is RILEM objective to gather together the most eminent specialists throughout the world in the fields of construction materials and structures. Aiming for excellence in all its activities, RILEM awards this recognized distinction annually.

Each year, the **Robert L'Hermite Medal** is awarded to a researcher of less than 40 years - not necessarily a member of the Association – who has performed high level scientific research in the field of construction materials and structures.

Jury Membership

The Jury to select the Robert L'Hermite Medalist and the Gustavo Colonnetti Medalist(s) is composed of:

1. The Chair of the TAC (Chair person)
2. The Editor in Chief of our scientific journal *Materials & Structures*
3. Two experts appointed by the RILEM Bureau under the proposal of the TAC

The Jury will meet electronically in January, and presents its preferred selection to the Bureau of RILEM.

Criteria

The following criteria apply to the authors:

1. They must have performed high level scientific research in the field of construction materials and structures.
2. They should be under the age of 40 years, when submitting their evaluation package (evaluation package listed in the letter sent to each possible candidate).

The list of applicants is sent to the members of the Jury at the beginning of the year before the Jury convenes.

In its final selection, the Jury must state the specific field of research, for which the candidate has been selected for the award and should emphasize the specific link with RILEM fields of activity and interest. This written summarized information should be presented to the Bureau, as a basis for the final decision and for further use and notification through *Materials & Structures*, News on our website, RILEM Newsletter, and social media.

In keeping with RILEM overall quality strategy, it should be stressed that the author selected must truly merit the award for exceptional contributions to his field of research. If, for a given year, the Jury does not consider that any of the candidates meet this criterion, then it is possible not to award the Robert L'Hermite Medal for that year.

If two candidates have made truly remarkable presentations during the same year, then the Jury should notify the Bureau that the candidate not selected for the award in that year should be taken into consideration for the following year, if he has not attained the age limit. This notification to the Bureau should be detailed by the Jury for direct use by the new Jury of the following year.

Privileges of the Robert L'Hermite Medalist

The Medalist is invited to give a lecture during the RILEM Technical Day of the RILEM Annual Week following the nomination. This lecture, which has to be in the theme for which the Medalist has been awarded, is to be published as an open access paper in an issue of our journal *Materials & Structures*. In case the laureate is not yet a RILEM individual member, the laureate will be offered a 2 years free membership.

Annex: Jury and submission procedures for the 2019 Robert L’Hermite Medal

Deadline for having researchers submitting their evaluation package:

31 December 2018 at 12:00 C.E.T.

Mailing address for the evaluation package (only electronic submission is accepted):

sg@rilem.org

Attention: RILEM Secretariat General
Mrs. Pascale Ducornet and Ms Anne Griffoin

Evaluation package (pdf files of each of the following documents):

- ❑ A detailed curriculum vitae of the author, including birth date and ORCID number. Application must be **no longer than 20 pages** including a list of important publications (with a clear distinction between the different types of publications), description of research, relation/contribution to RILEM.
- ❑ A portrait photo of the author (high definition photograph)

The Jury 2019 will meet in January 2019.
