Den Haag & Scheveningen

Some places always remain dear to one’s heart. The Hague can be said to be one such place. The city of peace and justice. The city of the cosmopolitan and the beach. From new styles to old masteries. From shops to palaces. From exotic cuisines to Dutch fishing harbours. From international jurisdiction to street-savvy. The Hague belongs to you, with its modern skyline combined with beautiful historical and royal buildings in the city centre. Discover The Hague with this must-see list!

Pierres Palace | Mauritshuis Museum | Binnenhof | Ship Café | Eicher Museum | Panorama Mesdag | Madurodam | Gemeentemuseum | City beside the sea | Palace Noordeinde | Scheveningen beach

Conference Location
Madurodam: Holland’s highlights and heritage. What makes the small country of the Netherlands so great!

Madurodam
George Maduroplein 1
2584 RZ DEN HAAG
The Netherlands

Accommodation
Our partner Preferred hotels has blocked a number of rooms in the most attractive hotels of Den Haag and Scheveningen for you. Browse through the selection and pick the hotel of your choice. In addition to the hotels on the website, we have compiled a list of other hotels and hostels within walking distance of the congress for you. Look at the website for links to hotels with special deals https://www.preferredreservations.nl/microdurability-2020

Important Dates

Submission of 500 words abstract
Notification of acceptance of abstract
Submission of 8 pages full paper
Notification of paper acceptance
Deadline for early registration
Conference date

July 31, 2019
August 31, 2019
October 31, 2019
January 31, 2020
February 28, 2020
October 12 - 14, 2020

Registration fees

Website
International RILEM Conference on Microstructure Related Durability of Cementitious Composites (Microdurability) is a Sino-Dutch initiative, organized under the umbrella of RILEM and also supported by ACI fib. After three successful events in Nanjing 2008, Amsterdam 2012 and Nanjing 2016, the fourth Microdurability conference will be held in Den Haag, The Netherlands on May 26 – 28, 2020.

In the recent years, alternatives, supplementary cementitious materials and different industrial wastes were used in concrete in order to improve concrete properties, and to reduce the carbon footprint of the construction industry. The consequence of these actions will change the chemistry, microstructure, and further influence the durability of concrete. Based on this concept the aim of the 4th Microdurability conference is to bring together the leading experts in this field from around the world to present the recent achievements, share the latest developments and address the challenges on the microstructure related durability issues of cementitious materials.

Main Topics
- Alternative binders, supplementary cementitious materials and industrial or regional wastes used in concrete
- Hydration and microstructure formation
- Transport properties in cracked and uncracked concrete
- Chemical and physical degradation under coupled loading conditions
- Effect of time dependent phenomena and aging on microstructure and durability
- New techniques for evaluation of hydration, microstructure and service life
- Development and application of smart cementitious materials for enhanced durability
- Modeling of microstructure, transport, degradation processes and design for durability.

Scientific Committee
Member
Angel Pobletos, CIC, Spain
Carlen Andiares et al., I3C, Spain
Changwen Miao, Southeast University, China
Changyong Qin, Southeast University, China
Donglu Li, Jilin University, China
Doug Houston, University of Toronto, Canada
Eberhard Breukink, Technische Universitat Darmstadt, Germany
Edward Gallagher, NIST, USA
Eric Schlangen, Delft University of Technology, The Netherlands
Geert van Santen, Ghent University, Belgium
Guang Ye, Delft University of Technology, The Netherlands
Rajkumar Kallury, Krefeld University of Applied Sciences, Germany
Hui Chen, Southwest University, China
Hans Bruining, Eindhoven University of Science and Technology, The Netherlands
Ippolito Malorni, Nagoya University, Japan
Jacek Jezierski, Oregon State University, USA
Jing Liu, Southeast University, China
Johan Wrobel, Technische Universitat Darmstadt, Germany
John Poulton, The University of Southern, UK
Jorge Saavedra, Materials Physics Center, CSIC, Zaragoza, Spain
Jes Boeijers, Delft University of Technology, The Netherlands
Jiachuan Cai, Changsha University, China
Kawo Seo-Neureuther, IPT, Switzerland
Ketui Liu, Beijing Institute of Technology, China
Klaas-Jan Beckers, Delft University of Technology, The Netherlands
Kumbakonam Deo, National Institute of Technology, India
Ling Wenyi, China Building Materials Academy, China
Luoyang Feng, Dalian University, Sweden
Nyairongo Sezibera, University of Zimbabwe, Kenya
Park Soon-Joo, Kunsan National University, South Korea
Marko Milicevic, University of Zagreb, Croatia
Maren Scholz, Graz University, Austria
Marko Stefanovic, Delft University, Netherlands
Marko Stefanovic, Delft University, Netherlands
Michael Ahn, University of Pretoria, South Africa
Mitch Sri Lanka, NTU, Singapore
Mingwen Gao, Shanghai University, China
Nobuyuki Imai, Kyoto University, Japan
Nikolay Tomarch, University of British Columbia, Canada
Ningguo Yan, Shandong University, China
Ole R.M. Jensen, Technical University of Denmark, Denmark
Panaiotis Louis, ETH, Switzerland
Pengyu He, University of Florida, USA
Qianqi Li, Southwest Jiaotong University, China
Quan-Mao, Tsinghua University, USA
Rik Wees, ETH, Switzerland
Shengli Zhang, University of Paris, France
Vitor L./my, University of Michigan, USA
Wolfgang Haim, Technical University of Graz, Austria
Wei Chen, Wuhan University of Technology, China
Weiming Ju, Tsinghua University, China
Xiaolong Shao, Nanjing University, China
Xiaoqiang Chen, University of Beijing, China
Yang Yang, Southeast University, China
Zhang Xiaoguo, Tongji University, China

Organizing Committee
Guang Ye, TU Delft, the Netherlands (Chair)
Changwen Miao, Southeast University, China
Erik Schlangen, TU Delft, the Netherlands
Jiapeng Liu, Southeast University, China
Huiwen Chen, Southeast University, China
Shishen Zhang, TU Delft, the Netherlands
Boyu Chen, TU Delft, the Netherlands
Alina Kostenchenko, TU Delft, the Netherlands
Iris Batterham, TU Delft, the Netherlands (Co-Chair)
